GP329 PLUS AND GP339 PLUS*

GP329 PLUS

- **LONE WORKER**

Added security and safety for individuals who work remotely from their team. The radio enters emergency mode if the user does not respond to the warning signal.

- **TALKAROUND**

Freedom to communicate utilising a system or dispatcher for wide area coverage, or bypass and talk directly to another unit for easy local unit-to-unit communications.

- **CHANNEL SCAN**

Allows activity on different communications channels to be monitored and answered.

- **WHISPER**

Allows a user to speak quietly into a radio and still be heard clearly.

- **CALL FORWARD**

Allows calls to be forwarded to another radio user if you are unable to answer your calls personally.

- **PROGRAMMABLE CHANNEL SPACING**

Programmable channel spacing, 12.5/20/25 kHz offers flexibility and easy migration of channel spacing.

- **ADJUSTABLE POWER LEVELS**

Allows you control over your radio usage optimises coverage and conserves battery consumption.

GP339 PLUS

Building upon the features of the GP329 Plus, the GP339 Plus has the following additional features:

- **DUAL TONE MULTI FREQUENCY (DTMF) CAPABILITY**

With the 3x4 keypad, the radio can send out DTMF codes in both the radio system and the telephone network.

- **USER INFORMATION AND ICON DISPLAY**

Equipped with the easy to read 14-character alphanumeric dot matrix text display, you are able to identify the caller and radios' operating status by just one glance on the LCD.

- **NAME TAGGING**

Capable of assigning visual caller-ID to 8 specific users/talkgroups.

- **BATTERY STRENGTH INDICATOR**

When equipped with LCD display, users will be warned on low battery strength through the LCD display indicator.

- **MENU**

User can select function through easy to navigate menu keys.

- **CONTACT LIST**

Enables users to access up to 100 pre-programmed numbers; displayed either in alphabetic or numeric formats. A total of nine tones can be tagged to the pre programmed numbers providing caller – identification.

- **BACKLIGHT**

Enhanced ease of use with backlight illuminating the radio display, keypad and menu navigation keys – programmable to be permanently switched on, off or switched on for a timed period.

THE SMALL AND COMPACT GP329 PLUS RADIO

The GP329 Plus radio is the simple two-way radio solution for professionals who need to stay in contact. The GP329 Plus can easily increase productivity by keeping users communicating, yet streamlines their radio use allowing them to concentrate on the job at hand. With the compact radio, communication couldn't be easier.

THE SMALL VERSATILE GP339 PLUS RADIO

The GP339 Plus is essential for growing organisations because of its unique versatility. When necessary, the radio can easily be programmed in the field to add or delete features. So, whether it's the harsh environment of a construction site or the elegance of an exclusive hotel, the GP339 Plus radio is the versatile choice which grows with you.

GP329 PLUS AND GP339 PLUS SELECT V KEY FEATURES AND BENEFITS

- **5-tone Selective Signalling Standards**

The radio software encompasses Private Line and 5-tone selective signaling which include ZVEI, Modified ZVEI, French Modified ZVEI, 20ms CCIR, 70ms CCIR, 100ms CCIR and EEA signaling system, that enhance productivity. These radios also offer users the flexibility to program their own "user-defined" signaling standards into the radio.

- **Clean Crisp Audio Quality**

As with any radio, sound quality is critical for effective communications. The GP series of radios can be heard in almost any environment because of Motorola's unique technology of voice compression called X-PAND™. Audio quality is crisp, clear and strong, allowing you to keep communicating, in virtually any noisy environment.

- **Voice Operated Transmit (VOX)**

The built-in voice-activated feature (VOX) enables user to operate in a hands-free environment. The user simply speaks and the radio will immediately transmit their message without pressing the push-to-talk button through the VOX compatible audio accessories.

- **Intrinsically Safe Equipment**

Motorola's GP329 Plus and GP339 Plus are designed to be intrinsically safe to use in hazardous atmosphere by the US Factory Mutual Standard, in Division 1, Classes I, II, III, Groups CDEFG and Nonincendive, Division 2, Class I, Groups ABCD.

- **Orange Emergency Button**

An orange-coloured dedicated emergency button is designed for emergency use and once it is pushed, a 'help' signal will automatically be sent to a pre-defined person or group of people until acknowledged to ensure the user safety.

- **Lithium Ion Battery as Standard**

Packed as standard the lithium ion battery significantly lightens the weight of the radio without compromising talk time.

BUILT TO MEET MILITARY SPECIFICATIONS

The GP Plus Series are commercial quality radios which has been tested to MIL810 (C,D and E) Military Specification Standards including temperature extremes, solar radiation, rain, humidity, salt fog, dust, vibration and shock. These tests were conducted subject to specific military procedures.
